POWER YOUR LIFE ANYWHERE

At Crowd Energy, we are changing the game by bringing convenient charging points to everyone, wherever people need power. Instead of asking "where can I find energy?" our network allows the energy to find you. Our inclusive platform welcomes everyone to join the Crowd. Install the free Crowd Energy App to become a part of the world's first peer to peer energy lending service network instantly.

What's included:

CROWD ENERGY NETWORK

Crowd Energy unlocks a network of Individual and Business Energy Providers poised and ready to offer EV charging services and safe parking spaces. Our borderless network is designed so that consumers can easily find a place to park and charge their vehicles anywhere in the world.

CROWD ENERGY APP

The Crowd Energy App is designed for both consumers and providers to make peer-to-peer energy lending easy for everyone.
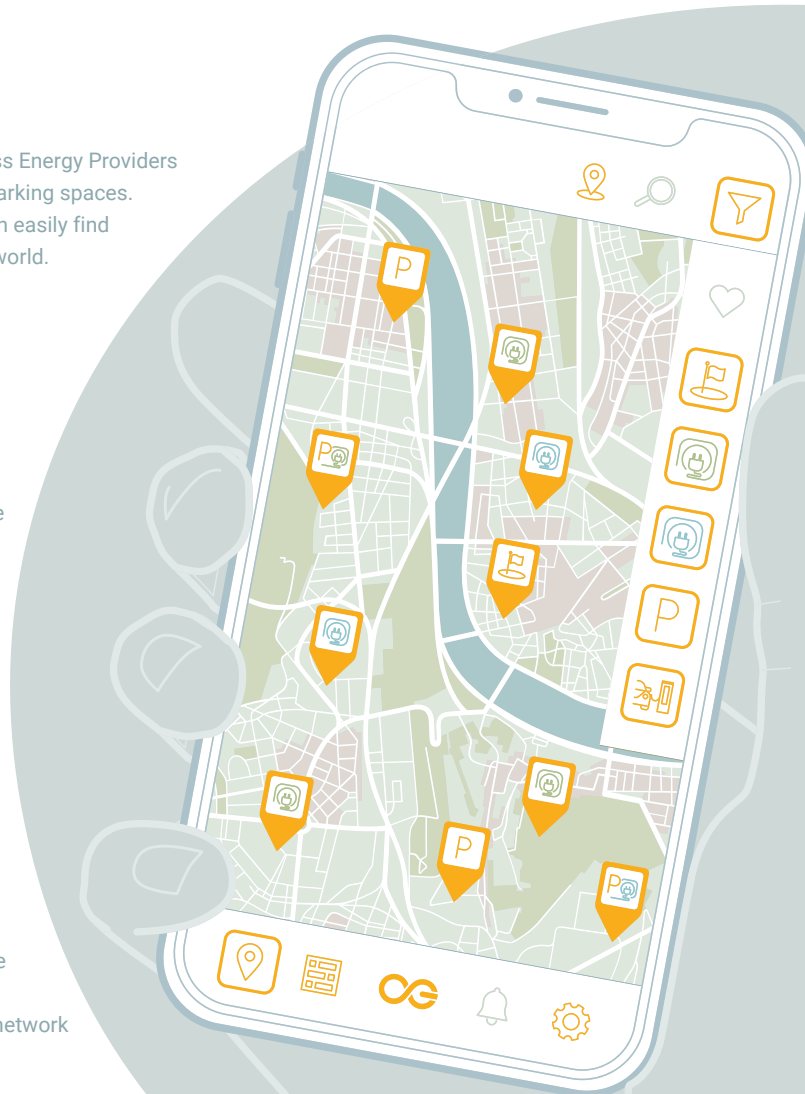

As a **Crowd Consumer** using the Crowd Energy App is as simple as opening the map to find details of available services nearby. From there, users can filter and adjust the map to fit their preferences, locate their destination, manage their credit balance, and activate/deactivate the services all within the app.

As an **Energy Provider**, the Crowd Energy App makes it easy to provide services, adjust pricing, and manage earned credits all in one location. Providers can register or remove new services seamlessly to fit the needs of their business.
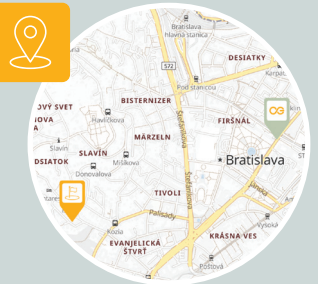

SERVICE DEMAND

Don't see any service providers nearby? Bring the crowd to you. Crowd Consumers can request electricity anywhere in the world with the Demand Service Map, which provides incentives for Energy Producers to join the Crowd Energy network in high demand areas.

Ready to experience the future of energy? Start and join the Crowd today.

1. Access the mobile app using the following link:
   https://app.crowdenergy.io

2. Install the mobile app on your mobile device's home screen for easy access.

3. Close web browser, locate and click to open the newly installed mobile-app from the home screen.

4. In the mobile app, click on the "Sign-up" button located in the settings menu to create a free account.

5. When the app is open, use the Crowd Energy network as a Crowd Consumer or an Energy Provider. From there, consume existing Crowd Energy services or share services to others as an Energy Provider, all within the mobile app.
